Taking care of Your Wool

We are constantly being asked the best way to keep wool carpet at tip-top shape, so here are a few tips for you to keep your carpet looking brand new!

Vacuum regularly, 1-2 times a week, so that dirt and soil will not have time to get embedded into the carpet fibers.

You never know when a spill will happen or when an pet will have a accident; this is why you should always have the proper cleaning supplies on hand because you want to immediately blot the mess up using an absorbent cloth. To prevent the stain from spreading while you clean, you want to work from the edge of the stain and move inward, DO NOT rub because this will cause the stain to spread. Blot as dry as possible.

Need a cleaning product? We have Capture® ready and available for you in our store!
